# Link directory

Welcome to our information links directory.

Here's a list of links to websites with useful information for health and safety practitioners on a wide variety of occupational safety and health related topics.

Please note that while these links are provided in good faith, their inclusion doesn't imply any endorsement by IOSH and non-United Kingdom (UK) listed sites may not be relevant to UK requirements. Commercial sites are only listed here if they provide free information believed to be unavailable elsewhere and if they are agreed by the IOSH Technical Committee. Read our [Terms of use](#) for information on links.

**Do you have a suggestion for a website we could include in our list?**

Send our team your feedback and suggestions for other websites and we'll check if we can include it on our list.

## New links

- Health and Safety Executive (HSE) - Shattered Lives

E-Learning and toolkits relating to slips and trips and work at height.

- Health and Safety Executive (HSE) - Books

Free downloads including guidance and approved codes of practice from the HSE website.

- British Occupational Hygiene Society

BOHS's aim is to help to reduce work-related ill-health. They have created a web site, with support from others around the world, so the latest free training resources can be available to all via an online hub for professional education in Occupational Hygiene. Here you can find training materials, learn how to become qualified in Occupational Hygiene or develop your career alongside an international community. See [OHLearning](#) for further information.

- Health and Safety Executive (HSE) - CIS 59

New guidance from HSE on the provision of welfare facilities during construction work.

- EEF The Manufacturers' Organisation

Guidance on the hazards and risks associated with metalworking fluids.
